EDUCATION

University of Georgia

Athens, GA

Bachelor of Science in **Computer Science**, Minor in **Design & Media**

May 2027 | GPA: 3.78/4.00

- **Relevant Coursework:** Software Engineering, Web Development, Data Structures, Algorithms, Networks, Database Management, and Computational Sciences

SKILLS

- **Programming Languages:** Java, Python, JavaScript, C/C++/C#, HTML/CSS, TypeScript
- **Framework/Libraries:** Pandas, Numpy, React, Node.js, Next.js
- **AI/LLM Tools:** Claude, ChatGPT, Gemini, Github/Copilot
- **Developer Tools:** Agile, Git, VSCode, Unix/Linux, AWS, Unity, Unreal Engine

EXPERIENCE

Speculative Devices Lab

Athens, GA

Research Technologist

Oct 2025 – May 2026

- Applied **Agile** prototyping principles to rapidly build and test experimental media projects using game engines and creative coding tools.
- Implemented a VR project through **Unreal Engine** with the usage of AI systems and tools for real-time data.

Castix LLC

Atlanta, GA

Game UI Intern

Jan 2026 – May 2026

- Designed and implemented **scalable UI systems** for an MMORPG in Unity (inventory, dialogue, menus)
- Built dynamic, **data-driven UI components** integrated with real-time gameplay systems

Office of Student Success & Achievement @ UGA

Athens, GA

Peer Learning Assistant

Aug 2025 – Present

- Supported undergraduate students in **Web Programming** by clarifying core concepts, debugging code, and reinforcing best practices, improving overall comprehension.
- Strengthened students' confidence and communication skills through one-on-one mentoring and guided problem-solving sessions.
- Collaborated with instructors in classrooms to provide tutoring support with course objectives and learning outcomes.

PROJECTS

Game Developer, T-Minus 5 Minutes

Jan 2025 – Apr 2025

- Developed a Unity C# game using **iterative Agile development**, continuously enhancing interactive game systems and gameplay logic.
- Collaborated with a multidisciplinary team to iterate on usability and visual design, improving player experience.

Full-Stack Developer, ByteSized

Jan 2025 – Apr 2025

- Practiced **SCRUM** methodologies within a team to build a responsive recipe and diet planner platform using **Next.js, TypeScript, and MongoDB**.
- Integrated front-end and back-end databases to enable secure user access and data management.
- Focused on accessibility and usability for college students, improving navigation clarity, and performance.

UI Designer & Developer, Mirror Mirror

Aug 2025 – May 2026

- Designed and created original UI assets for a Unity horror game, establishing a cohesive visual identity aligned with the game's genre.
- Implemented and animated interactive UI systems in Unity using C# into responsive, gameplay-driven interfaces

LEADERSHIP & ACTIVITIES

Girls Who Code, Lead Facilitator

Sept 2023 – May 2026

- Develop and teach coding lessons for K–12 students in multiple programming languages.
- Promote gender equity in technology through mentorship and outreach initiatives.

She Can Code, Vice President & Marketing Director

May 2025 – Present

- Develop and maintain a responsive website in React & Next.js to showcase organizational initiatives.
- Support mentor–mentee program of women in tech through digital outreach.

Project FOCUS, Service Volunteer

Aug 2026 - Present

- Contributed to community learning initiatives focused on quality education in science and sustainability through hands-on volunteer work in the Athens area and K-8 schools.
